

Family Constellations

Workshops and Training Programs for Beginners & Advanced
With Joanne Lynch-Bachbauer, LCSW-C

The Family Constellation approach invites one to totally embrace the present moment as a gift from the generations before us. The power of Family Constellation work lies in the "felt" experience of one's family system and its direct effects on one's current life situation. Long held notions, beliefs and struggles begin to melt away as we begin to understand life from this new perspective. We often see compassion, acceptance and love emerge to replace denial, resistance, anger and fear.

Our Family Constellation format includes an on-going training program and a workshop series that is open to the public. Whether you are looking to engage in an in-depth study of Family Constellations work or simply want to experience the power of this work in a one day workshops, there is a place for you in our upcoming programs.

Saturday Family Constellations "Open Workshops":

Participants may take one workshop or several. Each Saturday workshop is a complete program in and of itself. These workshops will give you new ways of understanding your family of origin and more possibilities/freedom to move forward in your life.

Family Constellations Training 2011 - 2012:

This highly experiential training will meet six weekends (Saturday & Sunday) over the next year. Each Saturday will be an open workshop for the public. Sundays are reserved for the trainees. This day will be dedicated to an in-depth exploration of the theory and practice. There will be ample time for each participant to explore their own family system from this perspective. Students of this training program will receive a strong foundation in the theory and practice of Family Constellations. This knowledge will both deepen your personal understanding of your own family system and will also increase your awareness of the unseen systemic forces affecting individuals, couples and families. Participants must commit to the entire training program.

NEW! Advanced Training and Supervision:

This program is open to people who have completed a minimum of one year training with the CoreConstellations Center, or the equivalent. This advanced training will focus on developing each student's skill level in facilitating constellation workshops. The guided practice sessions will increase confidence in using this model with individuals and/or groups. It requires a one year commitment and is integrated into the year long training and workshop series.
